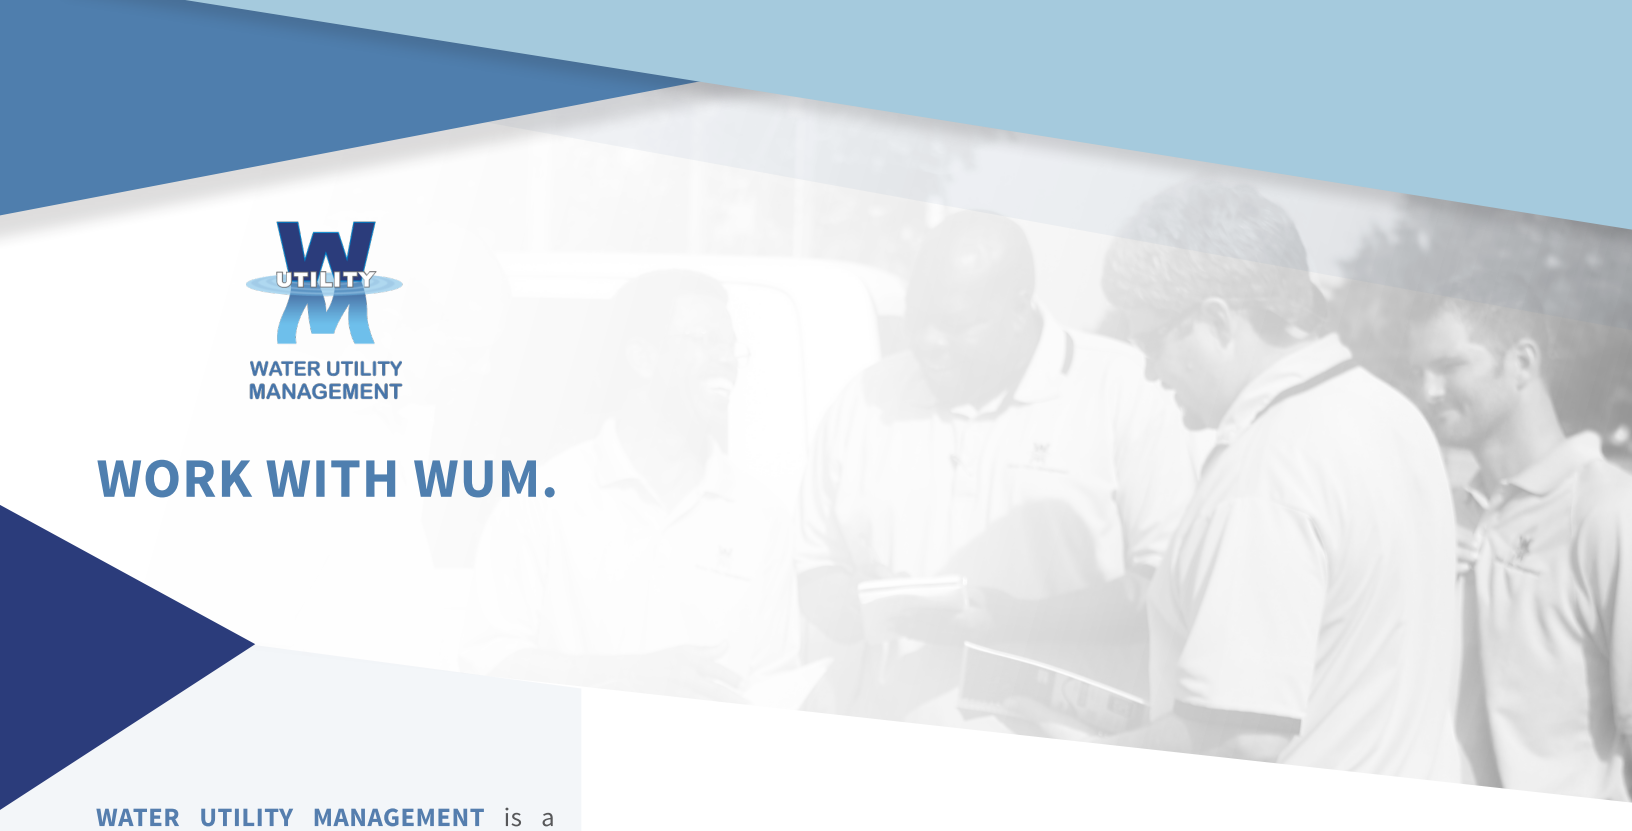
WATER UTILITY MANAGEMENT

WORK WITH WUM.



WATER UTILITY MANAGEMENT is a full-service water and wastewater utility provider. We work in partnership with developers to design, install, and operate community water and wastewater systems. We engineer water and wastewater systems in cooperation with a developer to obtain all of the necessary permits from local governments and the Environmental Protection Division (EPD). We have the ability to contribute to projects monetarily and through allocation of water capacity. Please contact us if you would like to discuss a future project, sale, or public-private partnership.

GET TO KNOW WUM

Water Utility Management is Georgia's largest private operator of community water and wastewater systems. We hold permits to operate over 200 community water systems, and 20 wastewater systems in Georgia, serving over 25,000 homes. We are headquartered in Savannah, GA, and have been in business since 1970. We are committed to providing our customers with safe, reliable Drinking Water and Wastewater service, and to providing an outstanding customer experience.

WATER CONSERVATION

We work in cooperation with the Georgia Environmental Protection Division (EPD) and other governmental agencies to promote water conservation. We are committed to preserving Georgia's natural resources, and to being good corporate citizens.

We take stewardship of our water resources very seriously, recognizing that many parts of the world lack security in their water resources. Water Utility Management supports and encourages others to support water charities throughout the world.

SERVICES OFFERED

WATER UTILITY MANAGEMENT'S core business is owning and operating community water and wastewater systems, however, we are a full-service company that offers the following additional services:

ACQUISITION

We are the most active purchaser of public and private systems in the state of Georgia, and have been since 1980.

CONSTRUCTION

We construct or oversee construction of water and wastewater systems for private developers or PPPs.

CAPITAL INVESTMENT

We have significant financial resources and will contribute monetarily toward water and wastewater projects.

DESIGN

We design water and wastewater systems in-house or in coordination with designated engineers.

MANAGED CONTRACT SERVICES

We operate water and wastewater systems on a contract basis.

REGULATORY COMPLIANCE

We maintain an excellent reputation with local and State regulatory agencies and have decades of successful experience navigating regulatory processes, including permit approval.

PUBLIC PRIVATE PARTNERSHIPS

We have experience with bid and proposal processes, and in participating in successful PPPs with local governments.

CONSULTING

We have over 40 years of experience in our industry and we are available to assist developers, owners, or governments achieve their goals.
